

ACI Inflation—Deflation System

ACI has developed the first Inflation/Deflation Station that meets MSHAW deflation requirements for OTR tires.

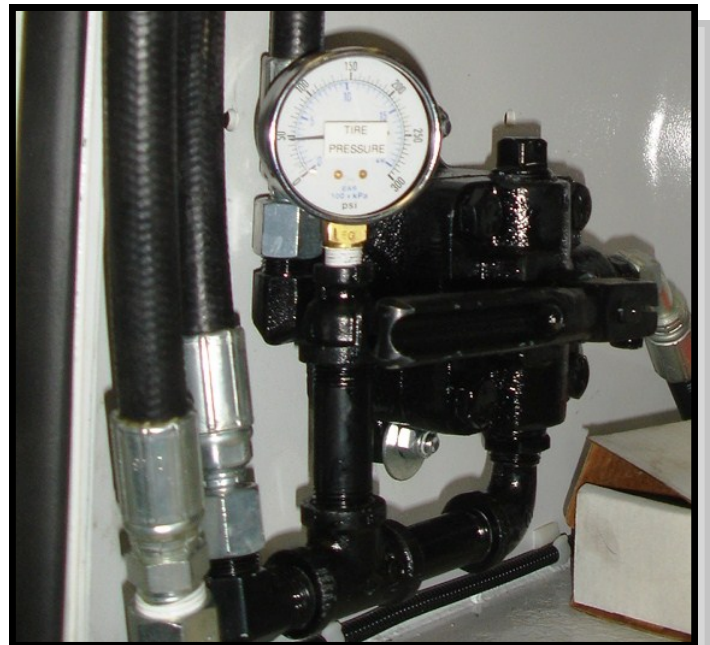

This system is a compact ship-out unit that can easily be installed on current service trucks by simply connecting one airline and one 12-volt wire.

The system consist of one locking compartment with mounting hardware and houses the following components:

- Retractable air hose reels 1/2" x 50' (qty-2)
- Air regulators (qty-2)
- Moisture separator (qty-1)
- Air line oiler (qty-1)
- Work Lights 12-volt (qty-2)
- Compartment light 12-volt (qty1)
- Small tire air inflation line 6' (qty-1)
- In-line air gauges (qty-3)
- In-line muffler (qty-1)
- Large bore valve core extractor gun (qty-1)
- Inflation/Deflation valve assembly (qty-1)

**ACI offers you options others don't: new, used, or rebuilt to meet your budget.
We are your service partner in the OTR tire market.**
